

Campaign Manager Dashboard

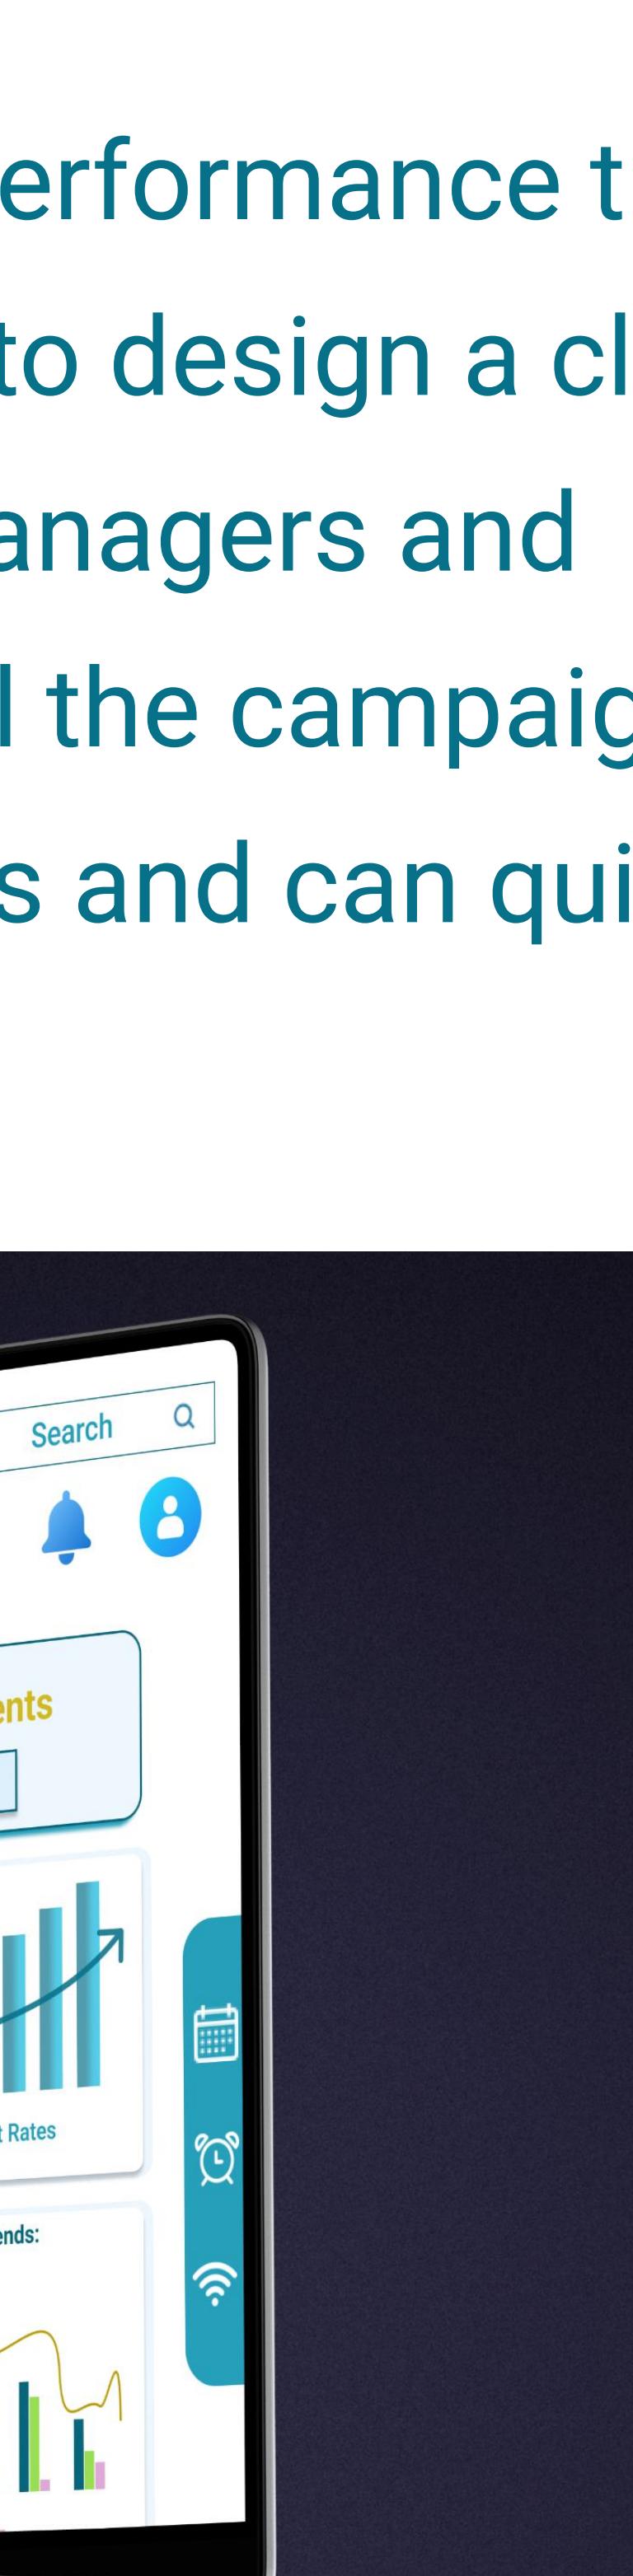

Population Health Intelligence Platform

UI Design for Dashboard

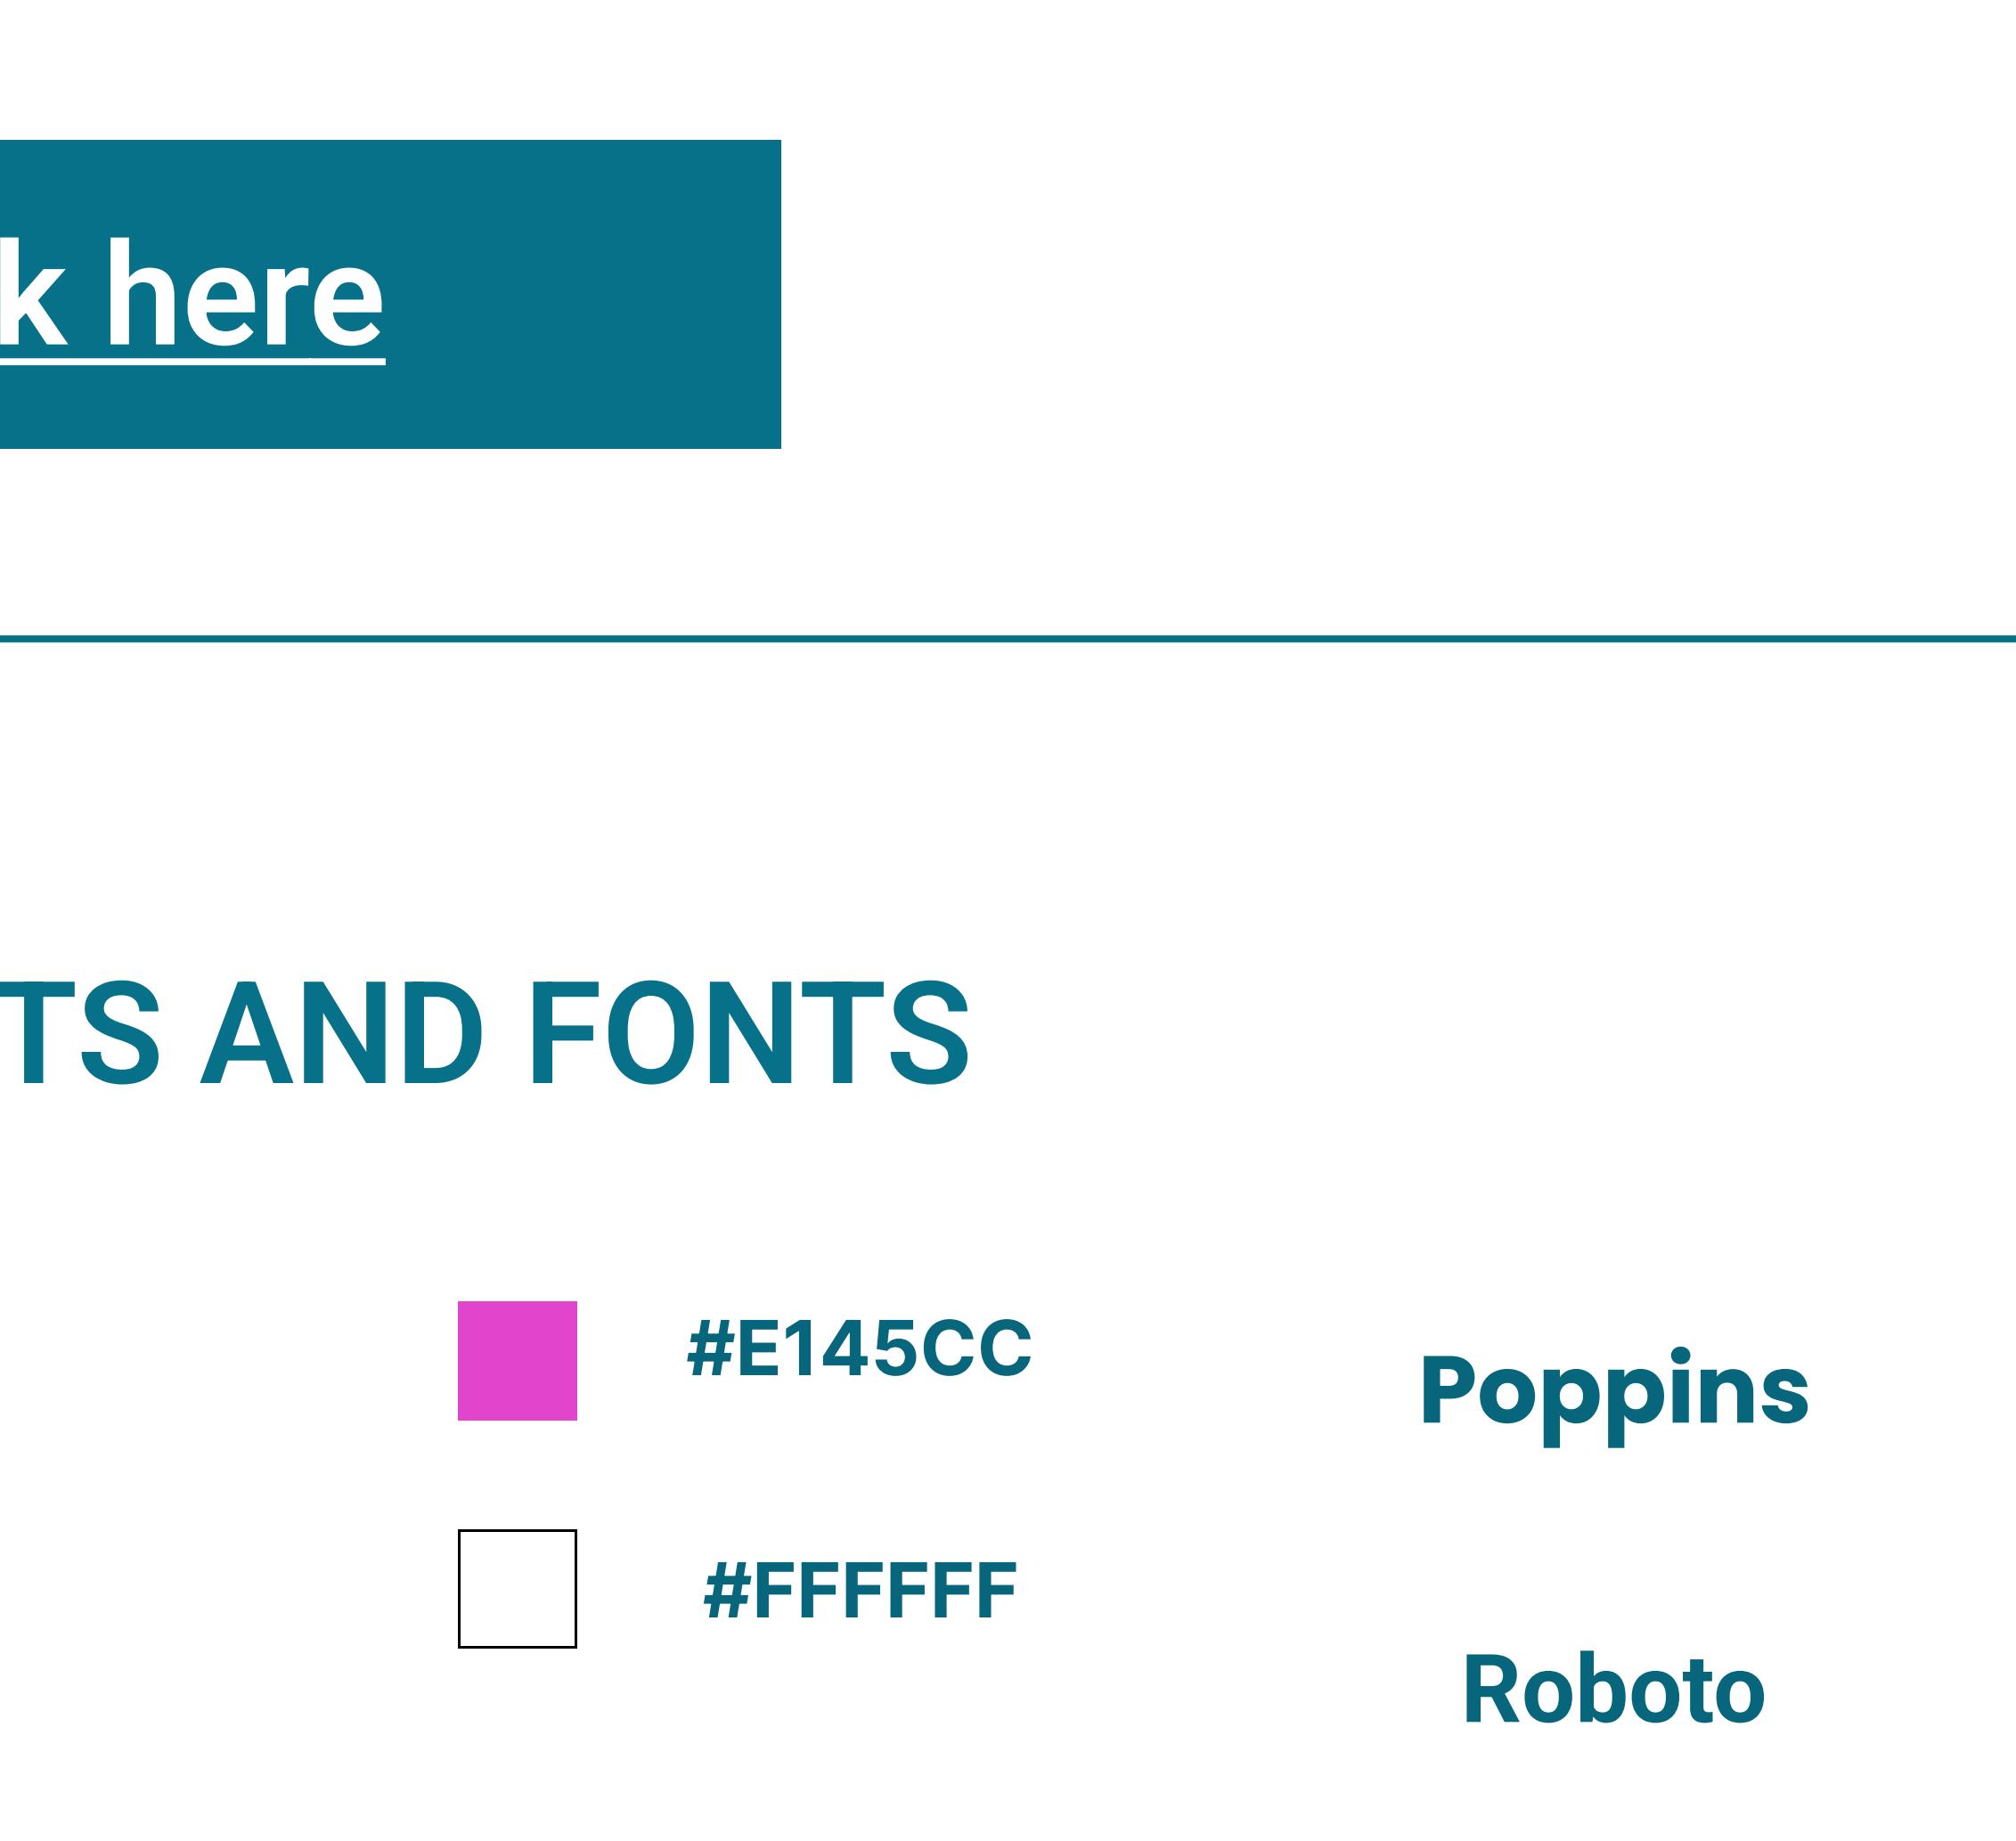

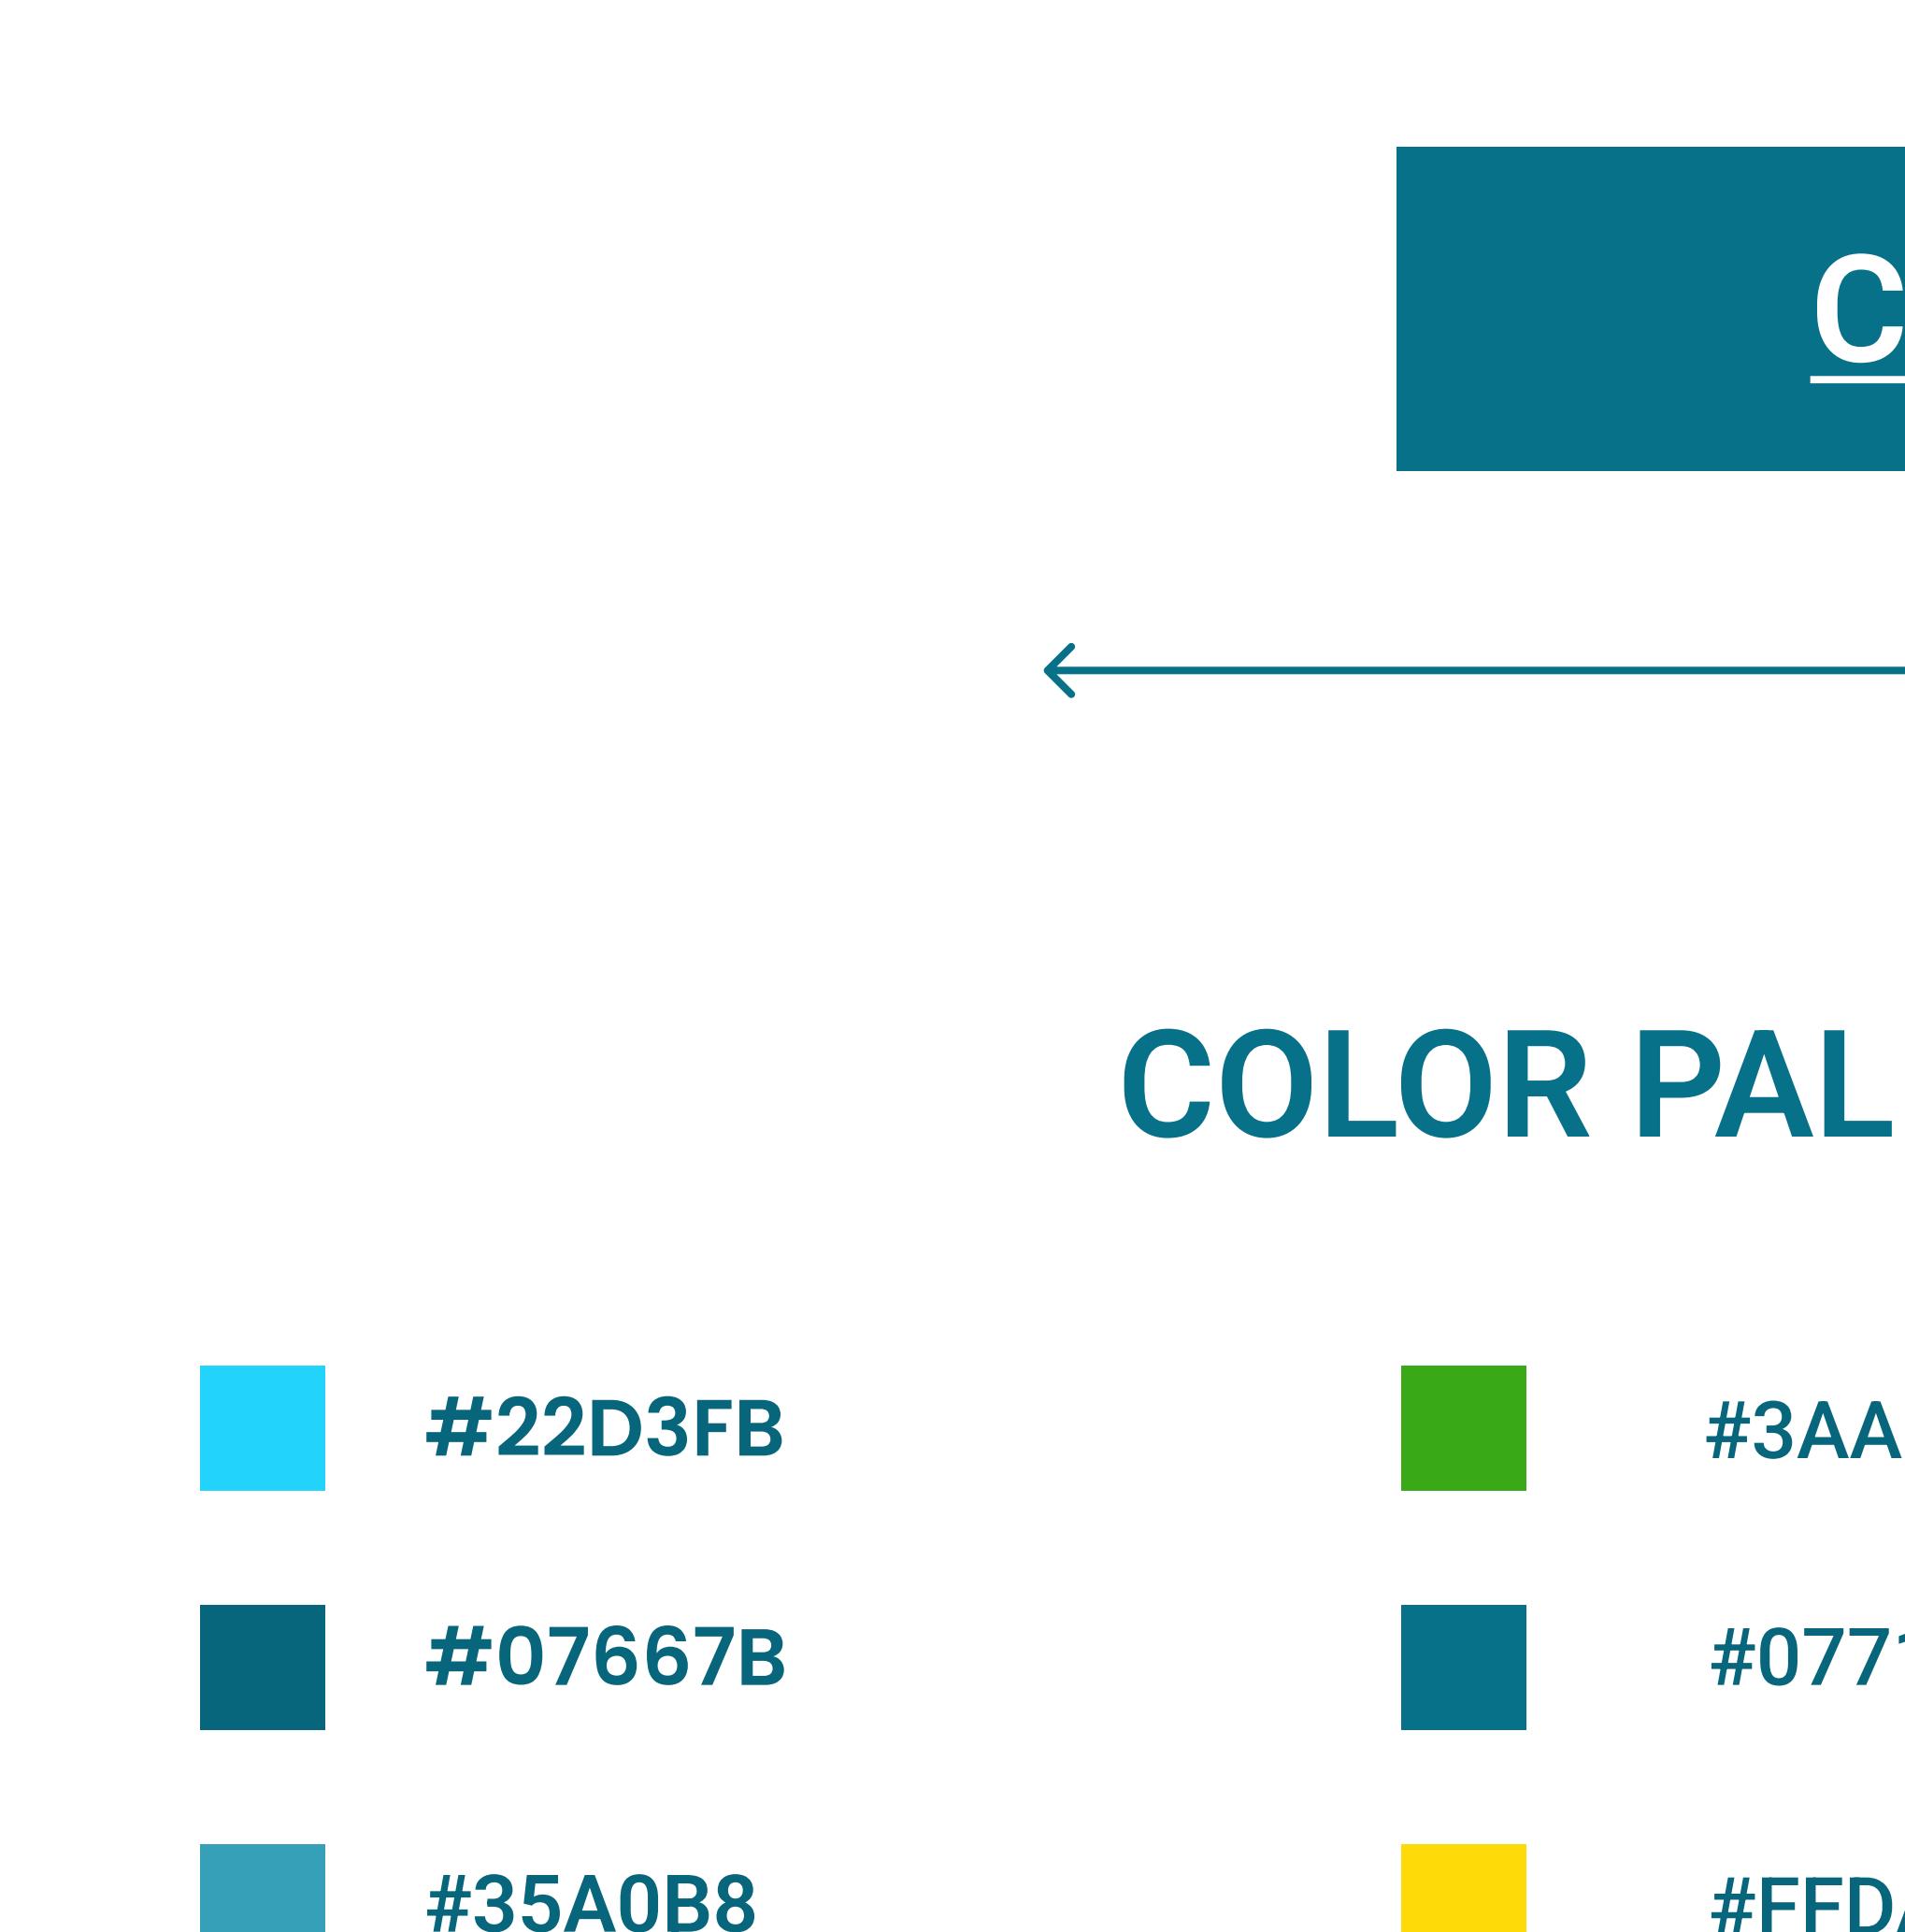

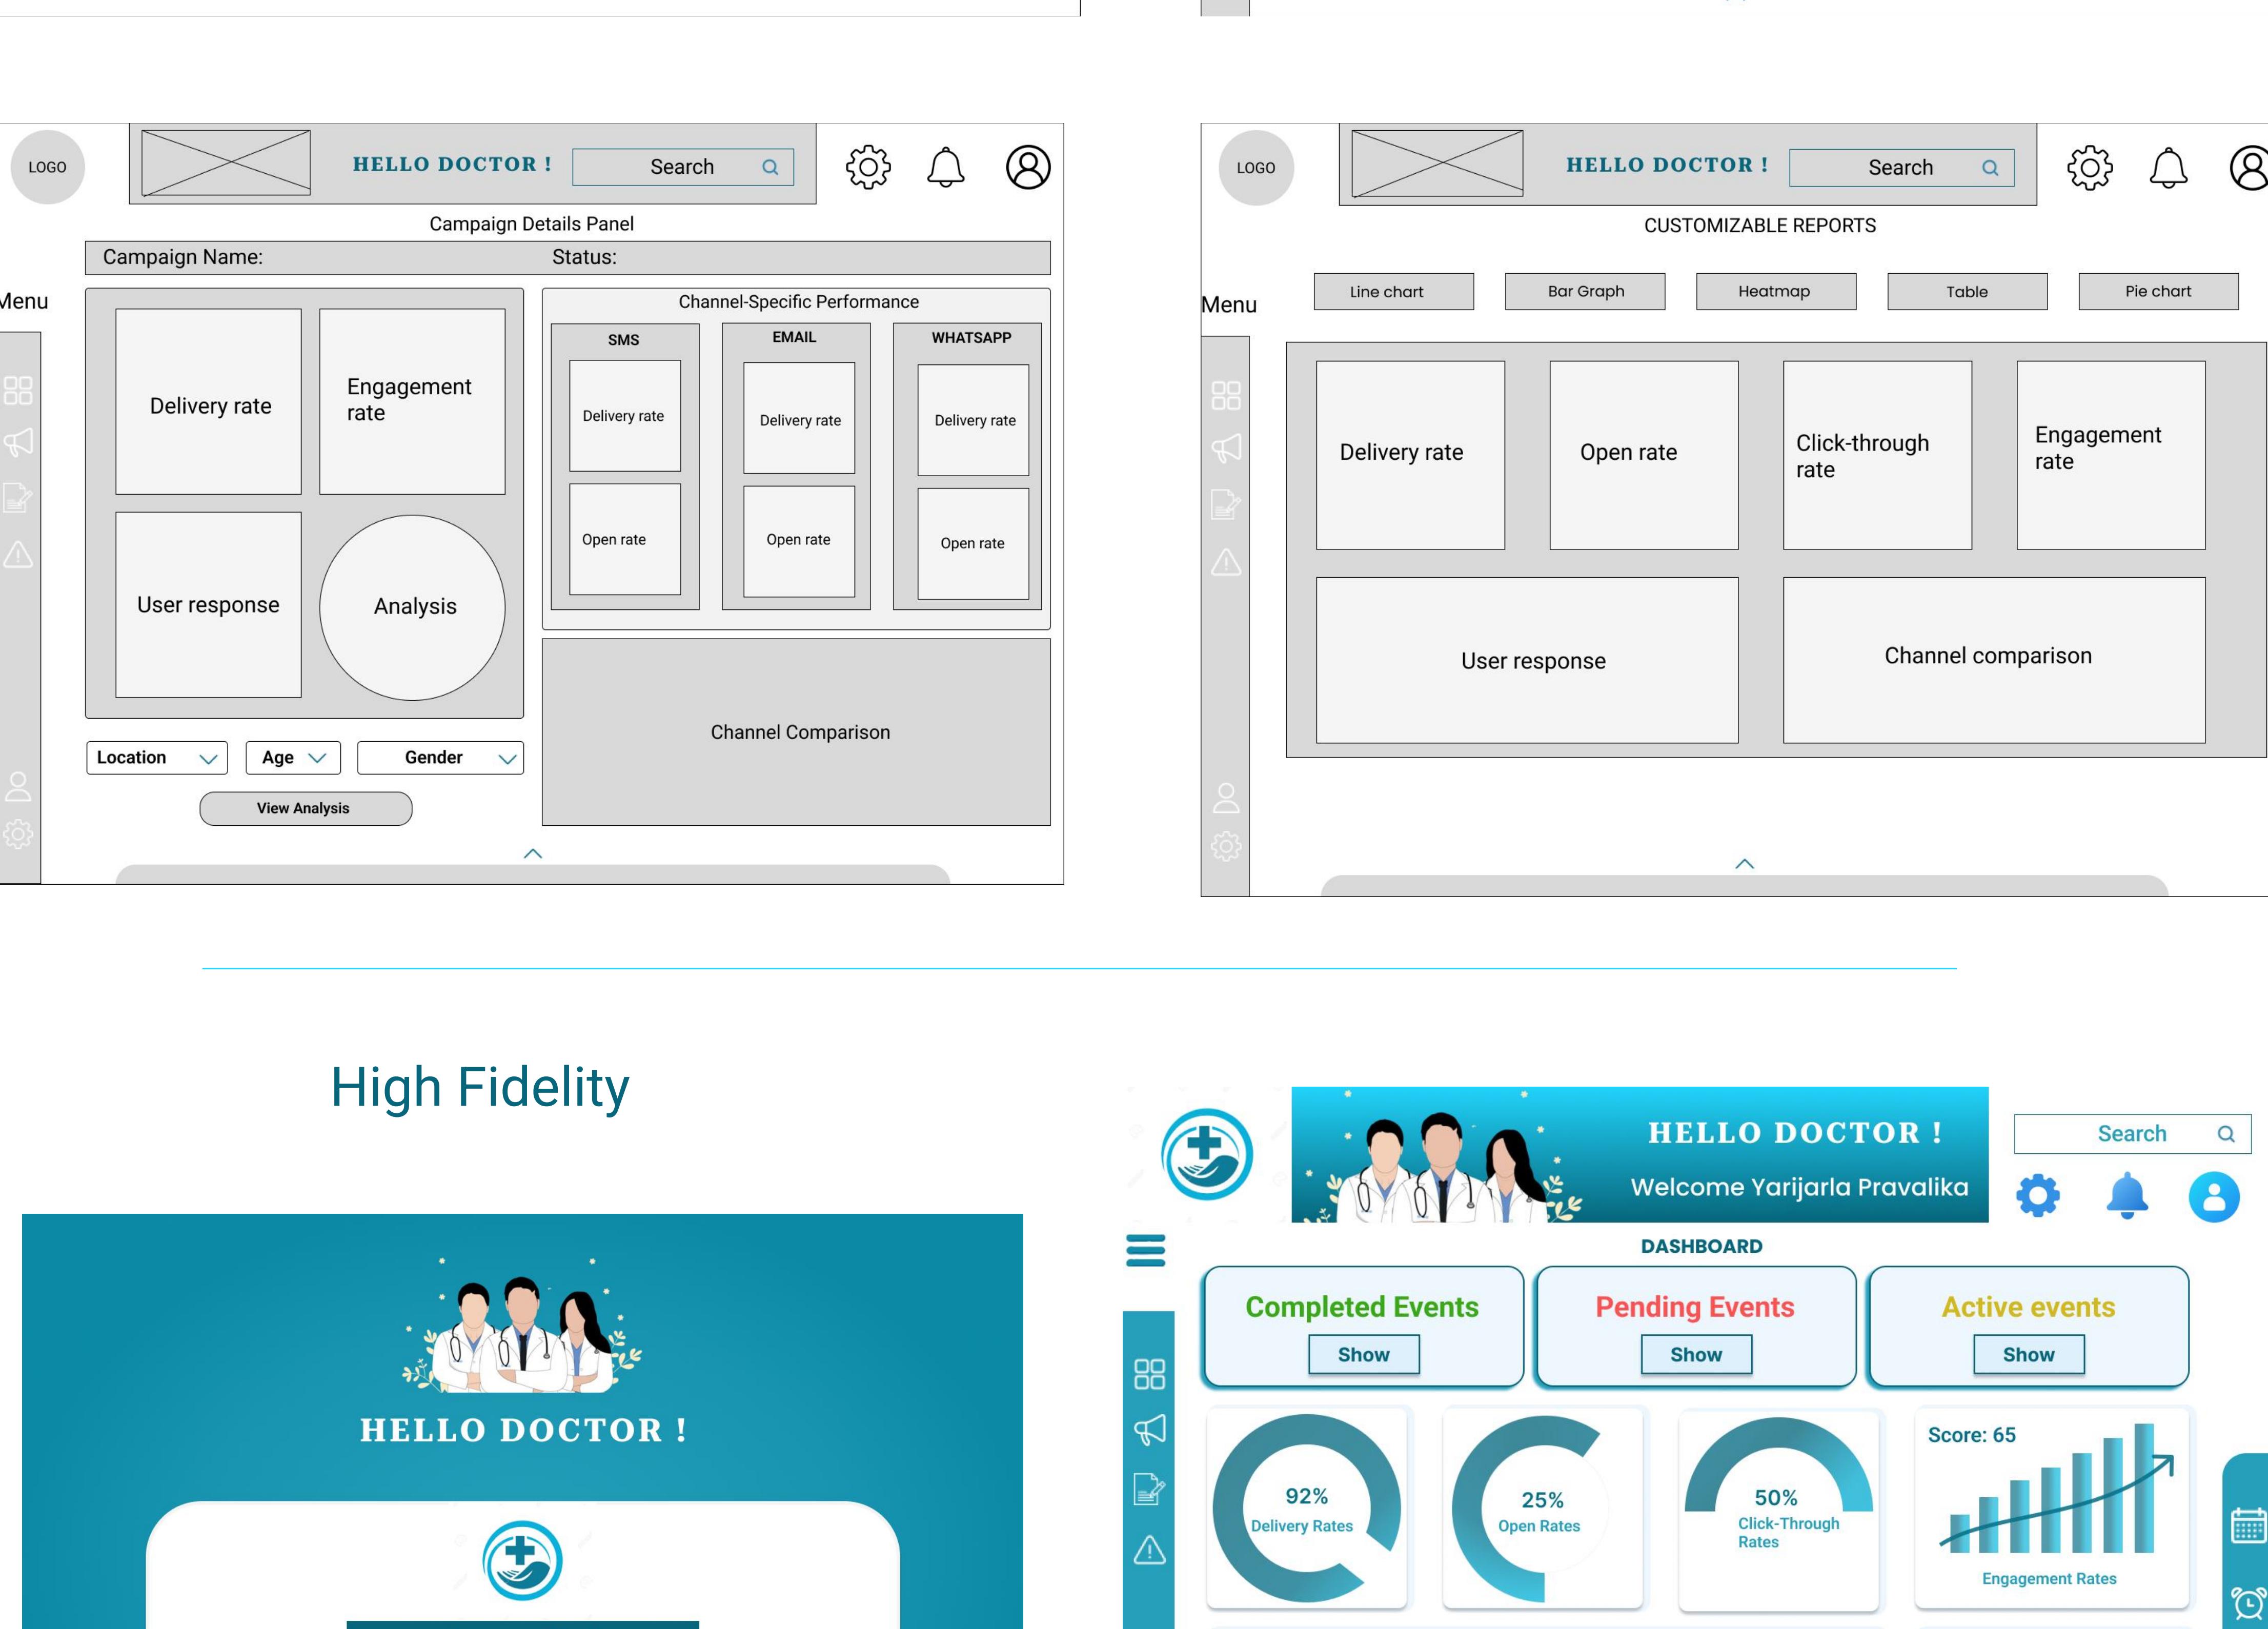

ABOUT

The Population Health Intelligence platform is a multi-channel campaign management system designed for healthcare campaigns. Campaign managers will use the platform to execute, monitor, and analyze campaigns across different communication channels (SMS, email, WhatsApp, etc.).

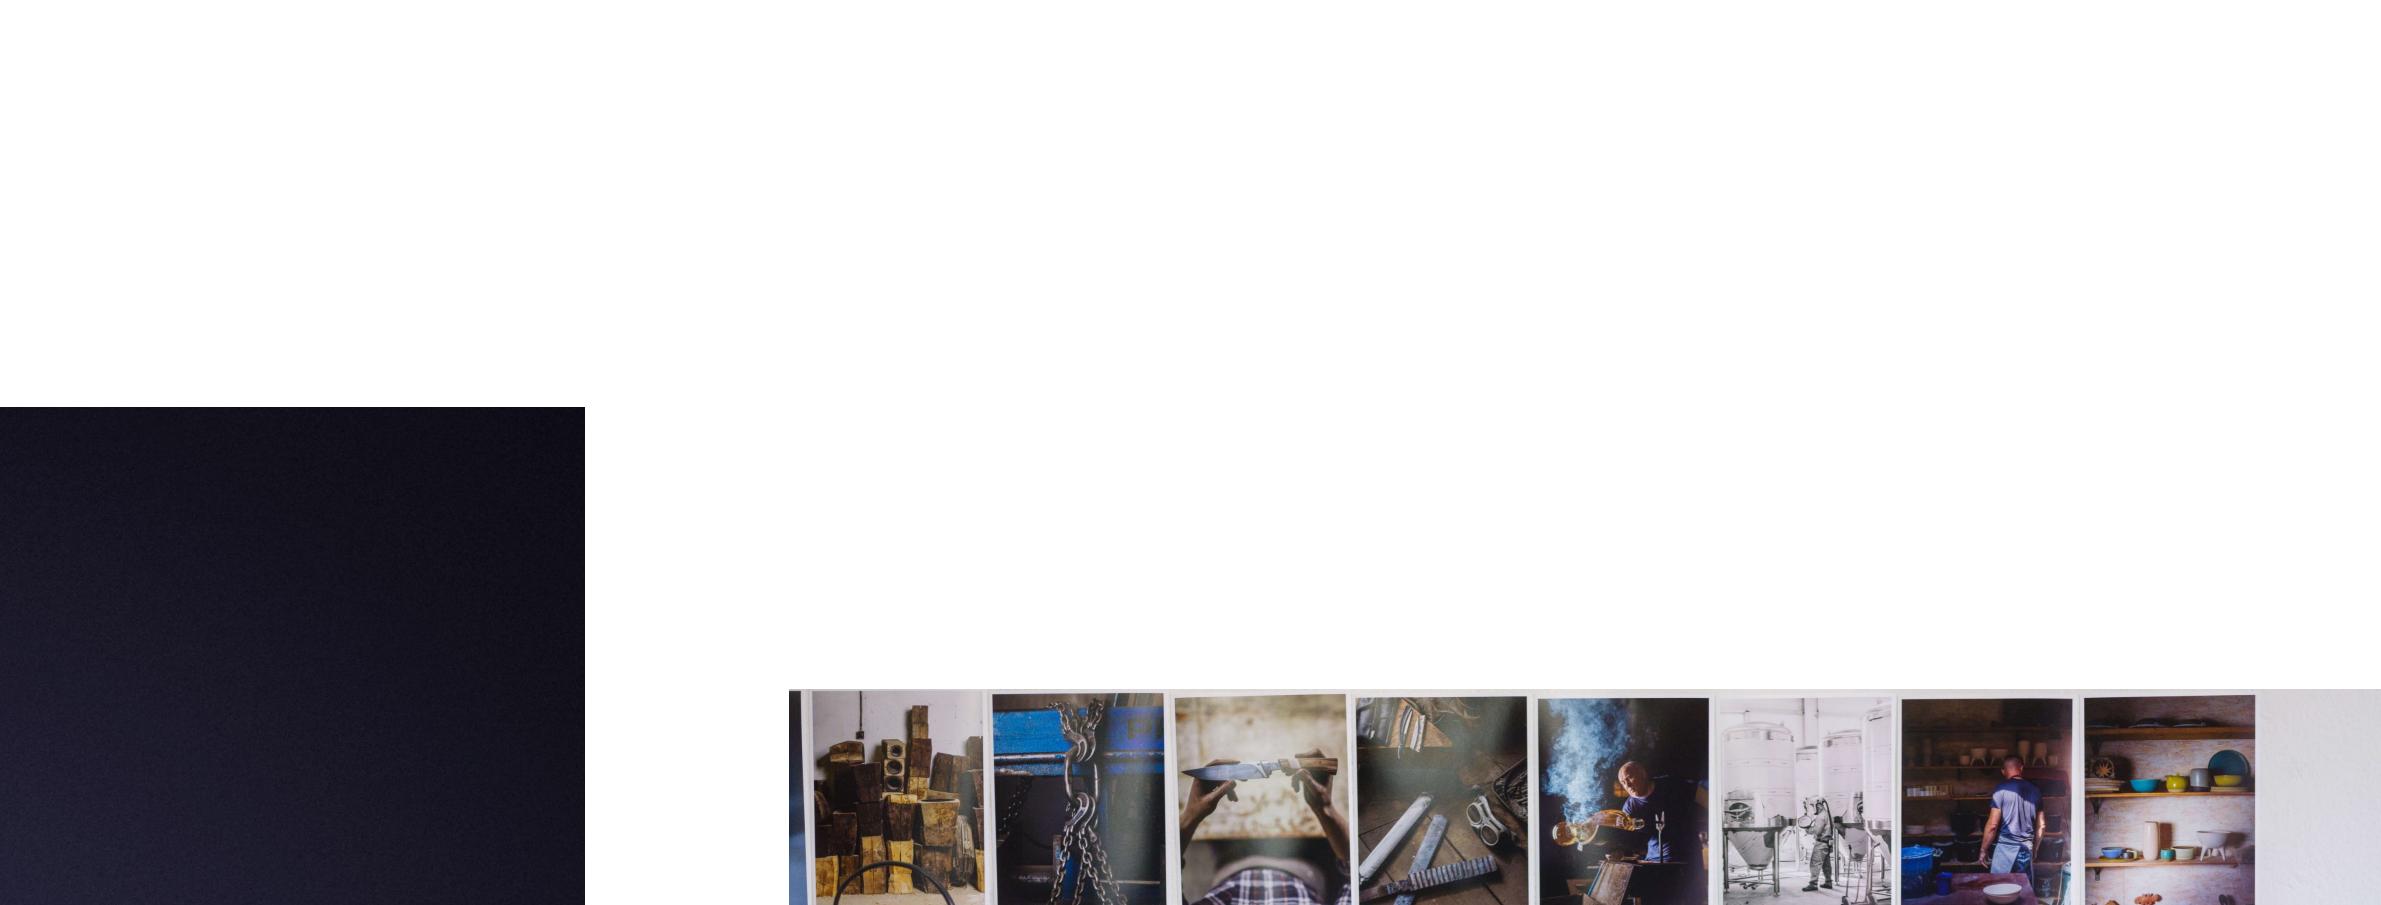

OVERVIEW

This Project includes Main Dashboard, Campaign performance tracking and Customizable report section. The main goal is to design a clear and understandable dashboard which can campaign managers and administrators are able to track, view and update all the campaigning details. Also, ability view reports in different aspects and can quickly export the performance details.
